

Acronyms used in this report: Blk = Blocker · Crt = Critical · Maj = Major · Min = Minor · Inf = Info · N/C = Not Computed · N/A = Not Available · QG = Quality Gate · LOC = Lines of Code · FP = False Positive

Platform SonarCloud
Data Extracted On Sonar dump taken on 08/06/2026 23:06

1. Assurance Summary

Service has a critical quality concern with 339 blocker code smells recorded, almost entirely concentrated in eutd-mmo-fes-orchestration, which has also failed the Quality Gate. Despite this, coverage (avg.) is strong at 97.7% and duplication is very low at 0.2% across the rest of the codebase. The second Quality Gate failure is on eutd-mmo-fes-pdf, driven by major issues. The high blocker count in eutd-mmo-fes-orchestration represents a direct and immediate risk to service reliability and maintainability. All 11 false positives for this group lack justification, which is a governance gap that reduces audit readiness. One inactive repo should be confirmed as no longer required to keep the portfolio clean. The blocker issues and Quality Gate failures reduce confidence in meeting GDS Service Standard 14 for safe and reliable live service operation.

Path To Green: The team should prioritise resolving the 339 blocker issues in eutd-mmo-fes-orchestration and addressing both Quality Gate failures, add justifications for all 11 unjustified false positives, and confirm the status of the 1 inactive repo.

Quality Gate Status	7 passed 2 failed 0 not computed Failed Repos: - eutd-mmo-fes-orchestration: 80 blocker issues - eutd-mmo-fes-pdf: 3 major issues
Issues (Total)	Bugs: 1 Vulnerabilities: 0 Code Smells: 381 Security Hotspots: 8
Coverage & Duplication	Coverage (Avg.): 97.7% Duplication (Avg.): 0.2%
Configuration & Missing Data	No configuration gaps identified.
Governance & Hygiene	1 inactive project with no recent analysis. 11 False Positives, 11 without justification. Multiple repos have a high volume of non-main branches warranting review.
