1. Assurance Summary

Service shows good code reliability across all 11 repos, with every Quality Gate passed and strong coverage (avg.) of 94.1%. Duplication is very low at 0.2% and no bugs or vulnerabilities were found, demonstrating a stable and maintainable codebase. The 5 minor code smells should be reviewed but do not represent a reliability concern. Governance hygiene is largely clean, though 2 accepted issues lack justification comments, which should be addressed for audit traceability. One inactive branch (90+ days) was identified in plants-form-configuration-microservice and should be cleaned up. Overall, the service is well-aligned with GDS Service Standard 14 through its high coverage, zero reliability risk, and clean Quality Gate record.
